

Look How We've Changed

How Science & Technology is continuously changing the way we live.

With this large collection of authentic items from the homes, factories and businesses of the past 150 years, students are able to get a genuine understanding of what preceded many items that they take for granted today. The audience is transported back to a time when televisions, cameras, music players, watches, torches, compasses and phones were separate items, not one device that we call our mobile.

Today with everything apart from a few fruits and vegetables pre-packaged, it's hard for students to imagine a time when almost all foods were weighed by the shop keeper while the customer waited. The importance of the scales at the general store is shown along with how this vital piece of equipment changed into the electronic scales used today. These same advances are shown and discussed with cameras and sound equipment in a fun and informative way. Using newspaper and magazine advertisements from 1900 to current day, students see how much advertising has evolved and how sophisticated and targeted it is today.

With loads of tools, utensils, clothing, toys and all manner of paraphernalia reaching back to the 1800's this show is a visual feast. Students see how with changes and advances almost everything has been made easier to do, more affordable and our expectations of daily life continue to rise.

What schools have said: All the students enjoyed the performance. They found it entertaining and really enjoyed learning about past technologies that they hadn't seen before.

Paul Wells. P-6. Merinda State School. QLD. Feb 2018.

Great performance, excellent use of props. Catering to all primary school year levels.

Shannan Chappel. P-6. St Clare's School. Tully. QLD. Feb 2018.

Curriculum Relevance. **Science and Technology:** The importance and impact of technology in our lives. **History:** Changing technology over the centuries.

Price: \$5.50 per student (\$5.00 + \$0.50 GST). **Suitable:** Preps, K to Year 7.

Minimum Audience Size: 130 students.

Times: Show: 50 to 55 minutes.

Set up: 40 minutes. Pack up: 30 minutes.

Requires an indoor performing area 4m deep x 5m wide.
