

Teachers' Notes for

A Swag of Tales

This exercise with the class can be done as either a Pre or Post show activity

At the beginning of the show, to explain how long ago the character in the show lived, he talks about Great (Times 9) Grand Parents. On the picture chart that was used to explain how long ago the character lived, we only showed one set of parents, each time we went back a generation. But of course we each have one Mum and two Grand mothers and four Great Grand mothers etc.

You might want at this stage to ask the class to guess how many Great Great Great Great Great Great Great Grand mothers they think they have.

ANSWER: You have:-

- 1 Mother
- 2 Grand Mothers
- 4 Great Grand Mothers
- 8 Great Great Grand Mothers
- 16 Great Great Great Grand Mothers
- 32 Great Great Great Great Grand Mothers
- 64 Great Great Great Great Great Grand Mothers
- 128 Great Great Great Great Great Great Grand Mothers
- 256 Great Great Great Great Great Great Great Grand Mothers
- 512 Great Great Great Great Great Great Great Great Grand Mothers
- 1024 Great Great Great Great Great Great Great Great Great Grand Mothers

and of course 1024 Great Great Great Great Great Great Great Great Great Grand Fathers

Starting at the bottom and explaining as you draw the following diagram on the blackboard is a good way to help Students understand the concept.

G.G. Grand Ma	G.G. Grand Pa	G.G. Grand Ma	G.G. Grand Pa	G.G. Grand Ma	G.G. Grand Pa	G.G. Grand Ma	G.G. Grand Pa	G.G. Grand Ma	G.G. Grand Pa	G.G. Grand Ma	G.G. Grand Pa	G.G. Grand Ma	G.G. Grand Pa	G.G. Grand Ma	G.G. Grand Pa
Great Grand Ma		Great Grand Dad		Great Grand Ma		Great Grand Dad		Great Grand Ma		Great Grand Dad		Great Grand Ma		Great Grand Dad	
Grand Ma				Grand Dad				Grand Ma				Grand Dad			
Mum								Dad							
YOU															

If you are the adventurous type you could explore with your students the possibility/probability that two of their great great ?? Grand Mothers and/or (some number of Great) Grand Fathers were the same person. This happens when 3rd, 4th, 5th etc cousins marry. More then likely, these people would not even know they are distantly related.

Another 'follow on' activity is to have the students (with help from home) fill in the above table with the names of their ancestors.

Houses from approximately 1850 to 1900

These three images taken at the Historical Village just off the Highway between the towns of Calliope and Mt Larcom, approximately 60 ks South of Rockhampton (Central Queensland)

Slab hut circa early 1880's.

Things to note in the photo.

1. Can you see the window? There is no glass. It is timber and is opened by pushing out the timber and propping it open with a stick.
2. The house is off the ground, on wooden stumps. This allows air to circulate under the house which helps keep it cool.
3. Note the name on the house EMOH YM. Another popular name for houses was EMOH RUO. Write the names backwards to discover their meaning.

Closeup of the slab hut.

Two things here worth noting:-

First the chair that the young boy is sitting in. It certainly was not bought in a store, it was hand made from materials at hand, probably by the owner of the house or a relative.

Secondly look at the width of the slabs of timber. Timber was the one building material that was readily available. Timber this wide is not used now days on the side of buildings.

Early Queenslander (veranda & stumps help keep the occupants cool by allowing air to circulate around and under the house). Possibly mid to late 1880's.

If you look carefully on the veranda you can see a stove, refrigerator and at the far end two washing machines. These are from the 1940's and 1950's.

THE GARDEN

OUT WITH THE OLD

Gardeners need not fear any more the results of severe flowering plants, and plant out the beds for a bright display through the warm months ahead. You will all have the satisfaction of knowing that it is far easier to get good results from one variety, because there are so many kinds of plants to choose from at present, that the trouble is to know which to turn out--most of us would like to try a little of everything that is offering; but, where the space is limited, we must be content with far less than we would have desired.

But, after all, it is far better to go in for masses of a goodly number of plants of one variety, than it is to have single plants of many different kinds planted at random. To get the best of planting is masses, if not of one color, at least of one variety, with a contrasting border of edging to set off the effect.

FEEDING GIVES RESULTS

Don't be mean with manure when you do the beds over before planting the summer flowering subjects.

OLIVE OIL . . .
The Great Beauty Oil

This much goes into every cake of Palmolive

STARTLING? Yes! And so vital in modern beauty care that 20,000 beauty specialists have united in recommending the daily use of Palmolive.

OLIVE Oil, is nature's great beautifier. It soothes, penetrates and PROTECTS the skin. But, can you get enough olive oil in soap? Palmolive answers: YES! And shows you just how much of this priceless ingredient is blended with oils from palm trees in the famous Palmolive formula. What about other soaps? Do you know what's in them? Can you risk using them on your skin? Palmolive labels every cake: made of olive and palm oils. That's why more than 20,000 beauty experts have, for years, urged its use. They believe in the beauty value of olive oil in soap. Listen to their advice. Use Palmolive to protect skin, to keep it young.

Copyright 1932

This ad is from the Murrumbidgee Irrigator November 1932.

Nowadays there are laws governing what people can say about their products when they advertise "truth in advertising". However in 1932 there was no such law.

List all the claims made in this ad. Discuss with the class which claims they think are 100% true. Which claims have an element of truth and which claims are total lies.

Get a cake of today's Palmolive soap and compare the two. One of the first things you'll notice is the shape. In 1932 Palmolive soap was a rectangular block, today it is much more curved and rounded corners. Why is it now this shape?
